

Product Story/Description

View your day, your way, with the Best Projection Alarm Clock. This powerful alarm clock features an easy-to-read color LCD display with all the information you need to start your day. Project current time and temperature + humidity information on your wall or ceiling; the projection image and tube are adjustable to ensure optimal viewing angle and orientation.

A wireless thermo-hygro sensor is included for real-time outdoor temperature and humidity readings on both your LCD display and projection. Connect to the La Crosse View® app to monitor your home's conditions on the go. Check current temperature and humidity levels, examine history charts and graphs, and set custom alerts to notify you if something seems off. When connected, the alarm clock receives precise internet time and date, 12 colorful forecast icons, daily forecasted HI/LOs, and chance of precipitation, powered by AccuWeather®.

This projection clock was rated The Best by the Hammacher Schlemmer Institute because it provided the most accurate time and temperature and was the easiest model to use. It was the only unit tested to provide 100% accuracy of time throughout the four week long evaluations. Its indoor/outdoor temperature readings were the most accurate of all units tested, varying by only .7°F and .6°F, respectively, while lesser models were off by as much as 2.6°F. The Best Projection Alarm Clock is also equipped with a 1-amp USB charging port, making it great addition to your nightstand, desk, or workspace.

Product Features

Projection

- Project Time/Weather Information on Your Wall/Ceiling
